

Future neutrino oscillation facilities

Friday 17 July 2009 17:45 (15 minutes)

The EUROnu FP7 Design Study has recently begun to investigate possible future high intensity neutrino oscillation facilities that could be located in Europe and elsewhere. This talk will describe the major challenges of these facilities and the accelerator R&D work that is being undertaken, particularly by EUROnu, to meet them.

Primary author: Dr EDGECOCK, Rob (STFC Rutherford Appleton Laboratory)

Presenter: Dr EDGECOCK, Rob (STFC Rutherford Appleton Laboratory)

Session Classification: IV. Detectors (LHC and R&D) and Accelerators

Track Classification: Detectors (LHC and R&D) and Accelerators
