

# The 2009 Europhysics Conference on High Energy Physics

## Saturday 18 July 2009

### VI. QCD in Hadronic Physics - Exhibition room B (09:00 - 12:35)

time	[id] title	presenter
09:00	[723] Transverse target spin asymmetries on a proton target at COMPASS - on behalf of the COMPASS collaboration	Mr RICHTER, Andreas
09:25	[908] Meson Spectroscopy at COMPASS	Mr HAAS, Florian
09:50	[643] Exclusive pion cross section and asymmetry at HERMES	HRISTOVA, Ivana
10:10	[788] A systematic study of the strong interaction with PANDA	Dr MESSCHENDORP, Johan
10:30	coffee break	
11:00	[93] Hadron mass generation and the strong interaction	Dr MORSCH, Hans-Peter
11:20	[646] Heavy quark meson spectroscopy at CDF	Mr WICK, Felix
11:40	[131] Why dispersion relations help in description of pion-pion amplitudes and lead to precise determination of the $f_0(600)$ ( $\sigma$ ) parameters?	Dr KAMINSKI, Robert
11:55	[484] Coupled channel description for $X(3872)$ and other XYZ mesons	Mr ORTEGA, Pablo G.
12:15	[773] Early Physics with the LHCf detector at LHC	Dr ALESSIA, Tricomi
