

The 2009 Europhysics Conference on High Energy Physics

Thursday 16 July 2009

VI. QCD in Hadronic Physics - Exhibition room B (09:00 - 18:15)

time	[id] title	presenter
09:00	[55] KLOE results on light meson properties	Dr DI MICCO, Biagio
09:20	[681] Physics with the KLOE2 experiment at the phi factory	Dr GAUZZI, Paolo
09:40	[823] QCD tests at NA48	Dr LAMANNA, Gianluca
10:05	[781] New Hadroproduction results from the HARP/PS214 experiment at CERN PS	Dr BONESINI, Maurizio
10:30	coffee break	
11:00	[530] Renormalization of B-meson distribution amplitudes	Dr DESCOTES-GENON, Sébastien
11:20	[507] Recent results on two-photon physics at BABAR	Dr DRUZHININ, Vladimir
11:40	[968] Charmonium-like results from BABAR	Dr GABAREEN MOKHTAR, Arafat
12:05	[832] Charmonium-like particles at Belle	CHOI, Sookyung
12:30	break	
14:30	[440] Cross-sections of hadron production by 3-15 GeV/c beams of protons and charged pions.	Ms BOLSHAKOVA, Anastasia
14:50	[834] Cross-section measurements at Belle	REISERT, Burkard
15:15	[580] Study of $\Upsilon(5S)$ decays to B^0 and $B^+ B^-$ mesons	Dr DRUTSKOY, Alexey
15:35	[971] Bottomonium Studies at BaBar	Dr ZIEGLER, Veronique
16:00	coffee break	
16:30	[833] Light particle searches at Belle	LIU, Chao
16:50	[695] Heavy hadron spectroscopy in a Salpeter model with AdS/QCD inspired potential	GIANNUZZI, Floriana
17:10	[749] $g_{B^* B \pi}$ coupling in the static heavy quark limit	Dr BLOSSIER, Benoit
17:30	[858] Strangeness Production in Deep-Inelastic ep Scattering at HERA	RUIZ TABASCO, Julia
17:50	[424] Measurement of charged particle spectra in pp collisions at CMS	Mr KRAJCZAR, Krisztian
