BIG SCIENCE network in Poland - objectives

CERN

szukamy wykonawców do
zamówienia IT

The goal of our team is to create a **platform for cooperation** between Polish industry and Big Science projects.

Promoting, acquiring and mediating **tenders** for the world's largest Big Science research centers (e.g. CERN, ITER, F4E, ESS, ELI, ESA, ESO).

Commercialization of technologies developed in research centers as well as dissemination of knowledge in the context of science, economy and innovation.

Building and developing the **recognition of Polish companies** in the international environment.

BIG SCIENCE – WIELKA NAUKA

BIG SCIENCE – WIELKA NAUKA is a venue where business meets science.

It is a platform enabling the flow of knowledge on how, where and with whom to establish relationships that drive measurable revenues. We bring together companies and institutions involved in innovations and new technologies. They can find new cooperation partners and demonstrate their activities and gain insight into the potential of other businesses, universities and business environment institutions.
