

Transfer of sediment-derived carbon into blackworm (*Lumbriculus variegatus*) and crucian carp (*Carassius carassius*): Implications for ^{14}C biosphere assessment in freshwater ecosystems

Conference topic

Progress in environmental radioactivity studies

Author: MAJLESI, Soroush (University of Helsinki)

Co-authors: IKONEN, Ari T. K.; HAVERINEN, Jaakko; AKKANEN, Jarkko; UZZAMAN, Sayed Tariq; SHIRANI, Zahra

Track Classification: Progress in environmental radioactivity studies
