

# Control channel update

1.0 M signal events

27 Nov. 2023

# Assumptions

- Considered second lepton from the  $J/\psi$  decay as the missing particle.
- Considered the missing momentum as the momentum of the missing lepton.

# Cuts in the reconstruction program

- MVA photon cuts
- $1.6 < m_{\text{hadROE}} < 2.4 \text{ GeV}$

# m\_hadROE with $\text{abs}(\cos(\text{PBtag}, \text{Pvis})) < 1$ and Rank 1

$\cos(PB_{tag}, P_{vis})$  with  $abs(m_{hadROE}-1.86)<0.015$  and Rank 1

sin\_phi with  $abs(m\_hadROE-1.86)<0.015,abs(cos(PBtag,Pvis))<1$  and Rank 1

Best sum of cosine angles with  $abs(m\_hadROE-1.86)<0.015,abs(cos(PBtag,Pvis))<1$  and Rank 1

Backup

Rank with  $\text{abs}(m_{\text{hadROE}}-1.86)<0.015$  and  $\text{abs}(\cos(\text{PBtag},\text{Pvis}))<1$
