

Control channels update

Control channel 1 (1.0 M events)

$$B^+ \rightarrow J/\Psi K^+$$

$$J/\Psi \rightarrow \mu^+ \mu^-$$

Control channel 2 (879285 events)

$$B^+ \rightarrow \Psi(2S) K^+$$

$$\Psi(2S) \rightarrow \mu^+ \mu^-$$

Last meeting comments

- Plots of best sum of cosine angles for different m_{hadROE} ranges for both control channels.
- Missing mass squared distributions for second control channel. (Not done yet)

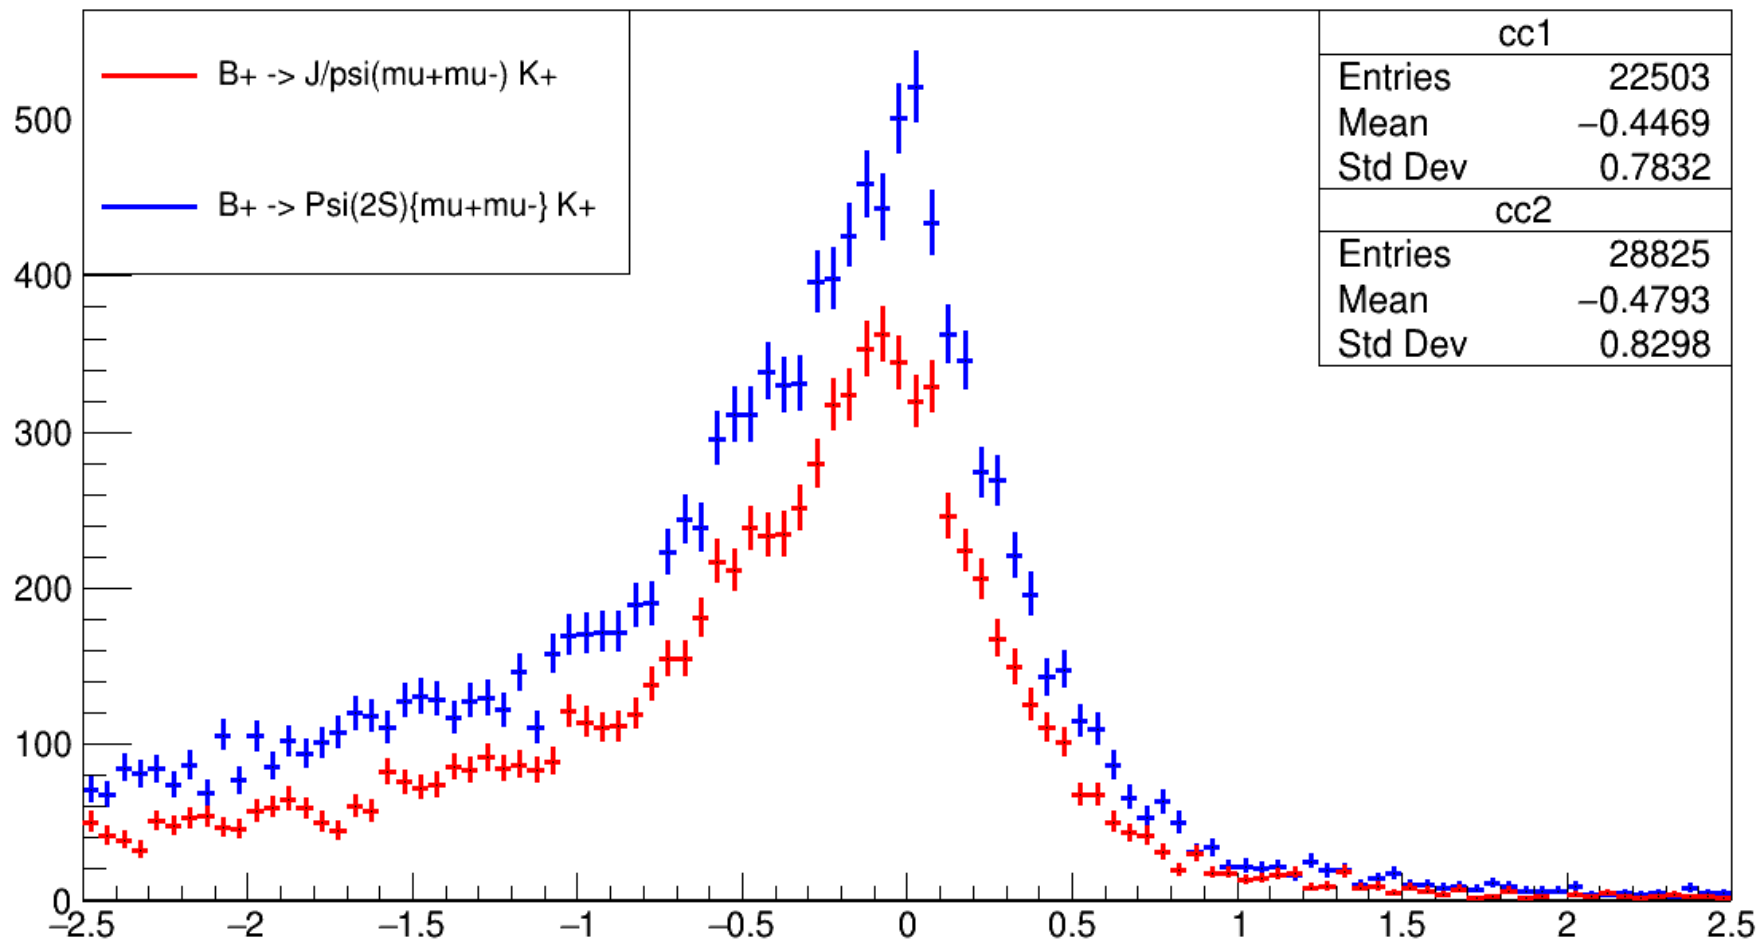

Cuts in the reconstruction program

- MVA photon cuts
- $1.3 < m_{\text{hadROE}} < 5.3$ GeV (for second control channel)
- $1.6 < m_{\text{hadROE}} < 2.4$ GeV (for first control channel)

Signal side cuts (root level)

- All applied cuts are mentioned in the title of the plots.
