

Multiscale phenomena in molecular matter

Tuesday 4 July 2017

Surfaces & Interfaces (15:00 - 17:00)

-Conveners: Marco Evangelisti

time	[id] title	presenter
15:00	[56] Slippery interfaces - dynamics of director and helix rotations	Prof. YAMAMOTO, Jun
15:30	[18] Surface dynamics of polymers studied using low energy muons	Dr PRATT, Francis
16:00	[39] Materials designed for electronics and IT technologies: porous silica thin films containing various functional units	Dr LASKOWSKI, Lukasz
16:20	[41] Hydrothermally synthesized crystalline hydroxyapatite coatings on nanoporous titanium substrates for biomedical application	Dr SUCHANEK, Katarzyna
16:40	[14] Highly ordered arrays of Fe ₆₀ Al ₄₀ nanomagnets embedded within flat paramagnetic matrix	Dr KRUPIŃSKI, Michał
