

XIII Workshop on Particle Correlations and Femtoscopy

Tuesday, May 22, 2018

Femtoscopy in A+A, p+p, p+A and e+e- collisions at relativistic energies (11:20 AM - 1:00 PM)

-Conveners: Łukasz Graczykowski; Wesley Metzger

time	[id] title	presenter
11:20 AM	[27] New exact solutions of relativistic hydrodynamics	CSORGO, Tamas
11:45 AM	[28] Interferometry correlations in central p+Pb collisions	BYSIAK, Sebastian
12:10 PM	[29] Femtoscopy with identified charged pions in proton-lead collisions at $\sqrt{s_{NN}}=5.02$ TeV with ATLAS	CLARK, Felix
12:35 PM	[30] Femtosopic Bose-Einstein correlations of charged hadrons in pp collisions at 13 TeV	PADULA, Sandra

Femtoscopy in A+A, p+p, p+A and e+e- collisions at relativistic energies (2:00 PM - 3:30 PM)

-Conveners: Wesley Metzger; Łukasz Graczykowski

time	[id] title	presenter
2:00 PM	[32] Lévy-stable two-pion Bose-Einstein correlations in $\sqrt{s}=200$ GeV Au+Au collisions	LÖKÖS, Sándor
2:23 PM	[33] Femtoscopy results from ALICE	JANIK, Małgorzata
2:46 PM	[35] Baryon-baryon correlations at the STAR experiment	ZBROSZCZYK, Hanna
3:09 PM	[36] Non-identical particle correlations	SZYMAŃSKI, Paweł

Wednesday, May 23, 2018

Femtoscopy in A+A, p+p, p+A and e+e- collisions at relativistic energies (4:30 PM - 6:00 PM)

-Conveners: Łukasz Graczykowski; Wesley Metzger

time	[id] title	presenter
4:30 PM	[88] Three dimensional Lévy HBT results from PHENIX	CSANÁD, Máté
5:00 PM	[86] Model independent analysis of nearly Levy sources	NOVAK, Tamas
5:30 PM	[87] Baryon-baryon femtoscopy in pp and p-A collisions	HOHLWEGER, Bernhard
