

Superconductivity: Superconductors Properties and their Application in Science

Tuesday, 9 December 2014 - Wednesday, 10 December 2014

The Henryk Niewodniczański Institute of Nuclear Physics PAN

Scientific Programme

The Conference program:

1. an overview of the research programme in the field of superconductivity and its applications in science in Poland and all over the world.
2. review the participation of Polish institutions in current international projects in the field of superconductivity and its applications in science in Poland and all over the world.
3. fundamental research in the field of superconductivity in Poland and their interdisciplinarity (chemistry, materials science, physics).
4. infrastructures for research in the field of superconductivity.
